VEYNA[®]
door
panels

About us

Veyna Company has been producing door panels since 1990 and since that time has gained a good reputation among many building companies and producers of aluminium and PVC joinery. We use the newest technology to produce door panels of the highest quality, as well as different types of glass and metal to ensure interesting and decorative design. Wide range of panels, both in classic and modern designs, can meet expectations of even the most demanding clients - the sample designs of our products are presented in this brochure.

Michał Weyna
- Owner

To distinguish the technologies used in the process of production, we have divided our door panels into six groups:

1. **Basic Line** - PVC-made panels
2. **Classic Line** – aluminium-made panels
3. **Economic Line** – economic PVC- and aluminium-made panels
4. **New Line** – aluminium-made panels in compliance with the newest trends in aluminium architecture
5. **Top Line** – extravagant aluminium fillings
6. **Extra Line** – aluminium fillings manufactured only on client's special request.

Our panels are used as fillings for aluminium and PVC doors, both for external and internal use. Door fillings should be installed in door leaves and door frames in accordance with the documentation attached. Our aluminium door fillings are available in all colours presented by the RAL colour chart or in the Renolit coatings. PVC fillings come in white colour (similar to RAL 9016) and in all Renolit coatings.

Veyna is quickly gaining recognition on the EU market, especially in Germany, where the sale reaches up to 60% of the whole production. What is more, we are proud to supply such reputable companies, like Bauhaus, Globus and Praktiker. We have all the necessary documentation and certificates for each of the components and give a 5-year guarantee on our products.

ECONOMIC LINE ALU/PVC

Economic line ALU/PVC is a line of economic door panels, which combine aesthetic qualities and current trends in modern door design. Competitive prices are also a great advantage. Economic Line offers a range of door panels with INOX stainless steel applications, which keep the glass elements in place. The Economic Line products are marked with letter "A".

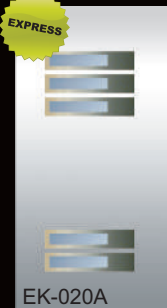

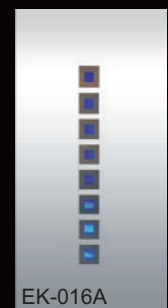

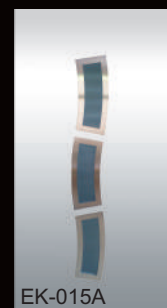

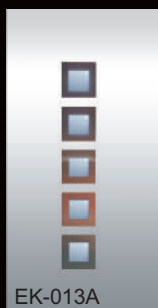

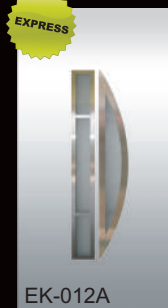

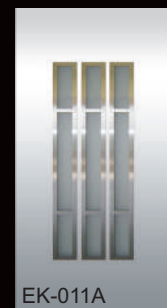

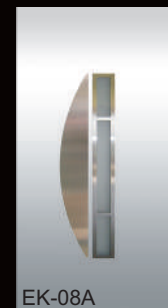

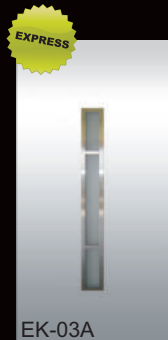

Dimensions: 2000 x 900 x 24 mm

Structure: 1,5mm/21mm/1,5mm

-1,5 mm aluminium plate

-21 mm rigid polyurethane foam

-1,5 mm aluminium plate

ECONOMIC LINE RENOLIT

To complete the range of the Economic Line products and adapt it to the popular PVC systems, we have recently introduced HPL and aluminium panels covered with wood-alike grain, available in all Renolit coatings.

Dimensions: 2100x900x24 mm PVC/HPL

Structure: 2,0 / 20 / 2,0

2,0 mm HPL

20 mm rigid polyurethane foam

2,0 mm HPL

NEW LINE

In all New Line panels the design is milled on both sides of the filling and the glass elements are placed between the exterior and interior layer of aluminium. To meet the latest trends in architecture, we have prepared door fillings with colorful aluminium applications (marked with letter "M") and new economic series without the milling cutters ("EK").

Colours: on request, according to RAL colour chart

Types of glazing:

- Ornament glass
- Safety glass
- Opaque/Matt glass
- Anti-burglary glass

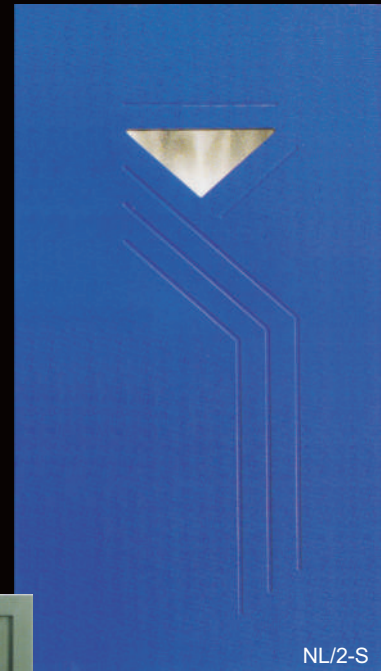

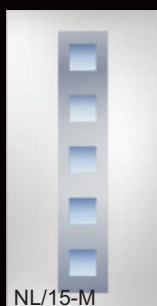

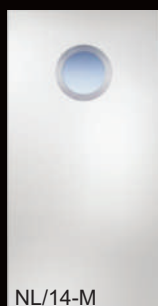

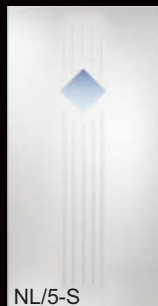

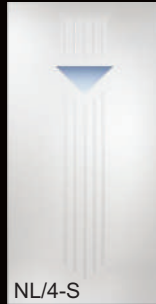

Dimensions: 2000 x 1000x24 mm

Structure: 2,0 / 20 / 2,0

2,0 mm milled aluminium plate

20 mm rigid polyurethane foam

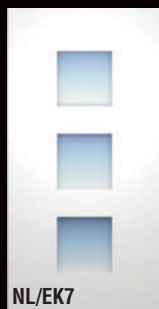

2,0 mm milled aluminium plate

TOP LINE

Top Line is the most luxurious line of aluminium panels available on the market. Top Line fillings are available in two versions: as a plain plate and with decorative glazed elements made of aluminium and framed into panels.

Dimensions: 2000 x 1000 x 27 mm

Structure: 3,0 / 21 / 3,0

3 mm milled aluminium plate

21 mm rigid polyurethane foam

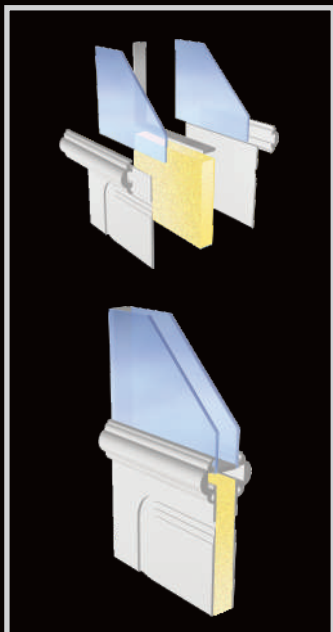

3 mm milled aluminium plate

Colour: on request; according to RAL colour chart

Types of glazing:

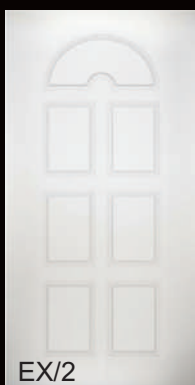

- Ornament glass
- Opaque/Matt glass
- Safety glass
- Anti-burglary glass

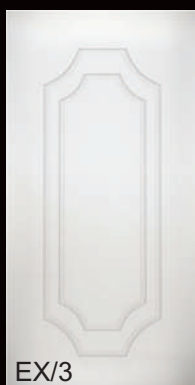

EXTRA LINE

EX/1

EX/2

EX/3

Extra Line panels are designed and manufactured only on special requests of our clients. Thanks to the extremely durable structure, Extra Line products can be used for burglar-proof doors.

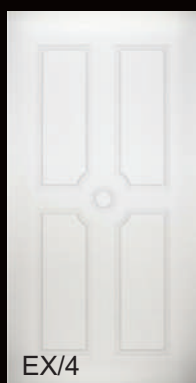

Extra Line panels are available only as plain plates, without glazing but give a possibility to use aluminium plates of different thickness (ex. 3 mm).

EX – SPECIAL - models priced and produced according to the client's own design (provided that the designs are not protected by the patent)

Dimensions: 2000 x 1000 x 26 mm

Structure: 3,0 / 20 / 3,0

3 mm milled aluminium plate
(various thicknesses available)
20 mm rigid polyurethane foam
(various thicknesses available)
